- 1. The Board of Trustees is an independent policy-making body that reflects public interest in Board activities and decisions.**
 - a. Based upon the Trustee's actions at Board meetings, including outright rudeness, eye-rolling, note-passing, name-garbling, scowling, sneering, smirking, and whispering, as well as their disrespectful treatment of those who make public comments by contradicting them instead of dialoguing with them, threatening censorship and accusing them of slander instead of listening, demanding the final word because speakers are only allowed to speak once, while Trustees can speak in unlimited monologues, the Board of Trustees clearly shows disregard for the public interest.
